## South Huron Valley Utility Authority (SHVUA) Interceptor Sewer System

Notes:

- Rain gauge locations were provided by Outbound Technologies.
- Flow meter and interceptor manhole locations were collected from CDM Smith's GPS survey efforts in 2009 and 2014.
- Lighter shade = service area; darker shade = tributary areas. Tributary areas were delineated prior to 2008 to support development of the SHVUA interceptor model and previous I/I study. They were approximations of areas that could runoff to sanitary sewers and may not include all full properties/parcels.
